MAJOR PROJECTS

(Partial list)

Millennium Villages Project (Director), 2005-present: The MVP is an innovative integrated approach to rural development, and simultaneously addresses the challenges of extreme poverty in many overlapping areas: agriculture, education, health, infrastructure,

gender equality, and business development. It brings together governments, academia, and UN agencies, and counts among its partners WFP, UNAIDS, UNFPA and UNESCO. The MVP has entered its second phase, and all 14 sites in 10 countries in sub-Saharan Africa, totaling 500,000 people, are on track to achieve the MDGs.

UN Sustainable Development Solutions Initiative (SDSN), Director, 2012-present: The SDSN will mobilize scientific and technical expertise from academia, civil society, and the private sector in support of sustainable-development problem solving at local, national, and global scales. The Network will accelerate joint learning and help to overcome the compartmentalization of technical and policy work by promoting integrated approaches to the interconnected economic, social, and environmental challenges confronting the world. The SDSN will work closely with Secretary-General's High Level Panel on the post-2015 agenda, United Nations agencies, multilateral financing institutions, as well as other international organizations.

Scaling Up the Millennium Villages Model: The MVP's model of integrated rural development and lessons learned is being scaled up across Africa. In Nigeria, the model is being extended to 113 Local Government Areas, covering 20 million people with the government planning to scale it up to the entire country. Other countries taking the model to scale include Senegal, Rwanda, and Ghana.

One Million Community Health Workers (CHWs) Campaign: Jeffrey Sachs is overseeing the One Million Community Health Workers (CHWs) Campaign, which aims to expand and accelerate CHW programs in sub-Saharan countries, scaling them up to district, regional, and national levels to meet the health MDGs. With the use of the latest ICT and diagnostic testing materials, these frontline workers link the rural poor to the broader healthcare system of doctors, nurses, hospitals and clinics.

Drylands Initiative: Working with governments of Djibouti, Kenya, Ethiopia, South Sudan, Uganda, and Somalia to achieve integrated rural development to benefit pastoralist communities.

Ministerial Working Group (MWG) on Scaling up of Primary Health Systems to Achieve MDG 4 and 5: Convenes 5 Ministers of Health and their technical experts together with an international advisory panel to support national efforts of scaling up of health systems to achieve the health MDGs. The countries participating in the MWG are Nigeria, Ethiopia, Kenya, China and India.

ITU/UNESCO Broadband Commission for Development: Commissioner and chair of a working group on health which focuses on the health MDG scaling up programs and how to use broadband and mobile to enable the primary health systems.

UN Secretary-General's High-Level Task Force on Global Food Security: Member of Task Force working to ensure that the UN system, international financial institutions and the WTO are ready to provide robust and consistent support to countries struggling to cope with food insecurity.

MDGs Africa Steering Group: Member of group that brings together top officials from the African Union, European Union, African Development Bank, Islamic Development Bank, International Monetary Fund and World Bank, in order to boost Africa's efforts to meet the MDGs and address Africa's unique challenges.

Connect to Learn: As Earth Institute Director oversees global education initiative that provides scholarships for secondary school, and uses ICT to connect classrooms and improve access to quality educational resources for students and teachers around the world.

MDG Advocacy Group: Member of UN Secretary-General's group of global leaders in promoting Millennium Development Goal Achievement; supports Secretary-General in building political will, rallying additional support, and spurring collective action to achieve the MDGs by 2015.

Drylands Ambassador: Under the umbrella of the United Nations Convention to Combat Desertification, works to raise awareness among decision makers and the public at large about the importance of combating desertification, land degradation and mitigating the effect of drought.

National Rural Health Mission of India: Advises the government of India on the National Rural Health Mission, launched in 2005 to focus on high-impact health interventions for rural populations. Advises the Model Districts project, in which five rural districts have been proposed as models for the regional scale-up of best practices that target poor maternal and child health outcomes
